Subject; Clear Flow Consulting Inc

“To Whom it may Concern”

We the National Research Council IRAP (Industrial Research Assistance Program) have been providing research assistance to Clear Flow to assist them to develop their patented water treatment technologies. I have been their Industrial Technology Advisor since April 2005. They have been provided NRC/IRAP financial assistance for two projects as follows: “ Polymer to Improve Water Discharge to the Environment” and “ Process for Treatment of Aquaculture Wastewater with Poly Acrylamide Polymers” They have been successful in their technological development and commercialization of this Polymer water treatment technology. We continue to have positive professional working relationship with Clear Flow and specifically Jerry Hanna their President.
